Thursday, 3rd March

**British Geological Survey
Nicker Hill, Keyworth**

8 pm (doors open at 7.30pm)

Tonight we welcome

Dr Colin Snodgrass
of the Open University

who will be speaking on

“Rosetta: Anatomy of a Comet”

Jupiter at Opposition: Rare Phenomena of the Satellites

A remarkable sequence of phenomena that may be observed for a day or so around Jupiter's opposition is the fact that the Galilean moons can transit directly in front of their shadows on the planet's disk. This year the night of March 7th–8th will provide a rare opportunity to see both **Europa** and **Io** doing so at the same time!

Europa and its shadow begin to move in front of Jupiter at 23:09pm. Io and its shadow will begin to move across at 00:28am, while Europa simultaneously is in the centre of the disk. Europa and its shadow will leave at 01:57am, and Io and its shadow at 02:43am.

On a simpler topic, if you would like to observe the famous **Great Red Spot**, it will appear central on Jupiter's disk on the following dates and times in the evening this month:

11:20pm on the 1st
8:50pm on the 4th
10:25pm on the 6th
9:35pm on the 11th
11:10pm on the 13th

8:40pm on the 16th
11:55pm on the 20th
9:25pm on the 23rd
11:05pm on the 25th
11:10pm on the 30th

Sky Notes

March 2016

Compiled by Roy Gretton

All times given below are in Greenwich Mean Time (GMT) unless otherwise stated

British Summer Time (BST) begins on Sunday 27th March. Clocks should be advanced one hour at 2 am on that date.

The **Northward Equinox** (known in the northern hemisphere as the Spring Equinox) will occur at 4:30am on March 20th.

PHASES OF THE MOON

<i>Phase</i>	<i>Date and time</i>	<i>Moonrise</i>	<i>Moonset</i>
Last Quarter	11:11pm on March 1 st	12:45am	11:05am
New Moon	1:54am on the 9 th	6:40am	6:40pm
First Quarter	5:03pm on the 15 th	10:15am	1:05am
Full Moon	12:01pm on the 23 rd	6:25pm	6:00am
Last Quarter	4:17pm BST on the 31 st	2:20am BST	11:20am BST

This month the Moon is closest to the Earth on the 10th and furthest on the 25th.

THE PLANETS

Mercury begins the month as a morning object, but practically unobservable. It reaches superior conjunction on March 23rd.

Venus, also a morning object, is virtually unobservable from the northern hemisphere this month.

Mars will move from Libra into Scorpius in mid-March. By the close of the month its apparent diameter will have increased to nearly 12 arcseconds, but unfortunately for observers in the UK it will be more than 20 degrees south of the celestial equator.

The prospects for planetary observation this month would be very poor indeed, were it not for **Jupiter's** gallant performance as the King of the night sky! He reaches opposition to the Sun on March 8th, and therefore will be visible all night long throughout the month. Although less favourably placed than he was two or three years ago, Jupiter remains north of the celestial equator until the autumn. The equatorial diameter will reach 44.5 arcseconds, and at magnitude -2.5 he is the brightest natural object in the night sky other than the Moon.

For those who enjoy watching the movements of the four brightest satellites, a list of shadow transits (the easiest phenomena to observe) visible in the *evenings* this month is given below. Look out for a dark spot crossing Jupiter's disk.

March	Shadow transit of
7 th	Europa begins at 11:09pm
9 th	Io ends at 9:12pm
16 th	Ganymede ends at 11:07pm

16 th	Io 8:50pm to 11:05pm
17 th	Callisto begins at 9:10pm
23 rd	Ganymede begins at 11:47pm
23 rd	Io begins at 10:44pm

Saturn is moves through the constellation of Ophiuchus in a direct manner until it reaches its first stationary point on March 25th, when it commences its retrograde motion. Being in this region of the sky (more than 20 degrees south of the celestial equator) Saturn will never be very far above the horizon when viewed from the latitude of Nottingham, which is a real disadvantage to local observers. If you do get the chance to view the planet through a telescope, you will see that the ring system is very well-presented, with Saturn's north pole tilted toward us at an angle of more than 26 degrees.

Uranus and **Neptune** are unobservable this month.

METEORS

The **Virginids** begin to show weak activity in the second half of March.

City or County Library Cards

Did you know your Nottingham City Council, or Nottinghamshire County Council library card allows you access to a whole wealth of online information and resources relevant to astronomy, and other hobbies and interests you may have?

There are nearly 300 online magazines you can read in full from the comfort of your own home, either on a computer or tablet device.

eMagazines available which are related to astronomy include:

- Astronomy
- New Scientist
- Sky at Night
- Digital SLR Photography
- Digital Photographer

In addition there are eBooks to download, access to daily newspapers, audio books, family history records, educational material and countless other services available for library card holders, not to mention all the other activities libraries undertake including book clubs and writing groups, meetings, events and exhibitions, as well as lending old fashioned books!

Some of the online services can only be accessed from a library computer, but many can be accessed from your own home.

To find out how to get more from your library card, or indeed how to register with the library service to get a library card, use the links below, or visit your local library:

Nottingham City Council Library Service:

<http://www.nottinghamcity.gov.uk/article/22851/Libraries>

Nottinghamshire County Council Library Service:

DIARY DATES 2016

Monthly Meetings of the Nottingham Astronomical Society

Our programme for this year is shown below. Check our website: www.nottinghamastro.org.uk for the latest information about the Society's meetings and for further information about the talks and speakers.

Our meetings are held on the **FIRST THURSDAY** of the month, at the British Geological Survey, Keyworth, Notts, NG12 5GG

(except **August**, when we meet at our observatory site, between Cotgrave and Cropwell Bishop)

Doors open at 7:30pm for 8pm start.

<u>Date</u>	<u>Topic</u>	<u>Speaker</u>
March 3 rd	Rosetta: Anatomy of a Comet	Dr Colin Snodgrass <i>The Open University</i>
April 7 th	Is There Anyone Out There?	Prof Ian Morison <i>University of Manchester</i>
May 5 th	Gamma Ray Bursts	Prof Nial Tanvir <i>University of Leicester</i>
June 2 nd	Gaia: A Billion Pixel Survey of a Billion Stars	Dr Elme Breedt <i>University of Warwick</i>
July 7 th	The Antikythera Mechanism: an Ancient Astronomical Computer	Prof Mike Edmunds <i>University of Cardiff</i>
August 6 th (Saturday)	Society BBQ at the Observatory	
September 1 st	Images of the Universe - 2	Paul Money
October 6 th	Open Evening <i>including a Telescope Surgery</i>	
November 3 rd	Annual General Meeting 2016	
December 1 st	Galactic Monsters: Seyfert Galaxies, Radio Galaxies and Quasars	Dr Marek Kukula <i>Greenwich Observatory</i>

NAS Library

I'll be at the March meeting with a selection of books for members to borrow. I will also have some astronomy magazines which you are welcome to have, and if you have any unwanted astronomy magazines which you'd be happy for other members or visitors to have then please do bring them in.

The full list of books in our lending collection can be found here: [NAS Library Collection](#).

Lorraine NASlibrarian@hotmail.com

NAS Helpdesk

If there are specific topics you'd like to see as an article in the Journal, or as a help sheet, do let us know and we will see what we can do.

We will be on hand at the March meeting should you have any questions about astronomy equipment or its use, or just for a chat.

James Dawson and Bob Richardson

FOR SALE

Brightstar manual filter wheel (holds up to five 1¼-inch filters)	£30
Set of four 1¼-inch coloured filters (red, yellow, green, blue)	£20
Mars filter 1¼-inch	£10
Moon filter 1¼-inch (25% transmission)	£10
Filter case (holds up to four 1¼-inch filters)	£2
Celestron lens pen	£2
Micro-fibre cleaning cloth	£2

James Dawson

Meetings

Our meetings, often with an illustrated talk by a guest speaker, are held on the first Thursday of each month (except in August) at:

**The British Geological Survey
Nicker Hill
Keyworth
Nottingham NG12 5GG**

Doors open 7.30pm
Meetings start 8.00pm
Meetings end 10.00pm

Meetings are open to the public, and visitors are welcome to attend.

Annual subscriptions 2016

Full	£30
Joint rate for partners living at the same address	£45
Under-18s and full-time students	£5

Subscriptions become due on 1st January. Half-price subscription is charged if joining after 30th June (minimum subscription £5).

Please make cheques payable to:
Nottingham Astronomical Society.

If you would like more information about the **Nottingham Astronomical Society**, or would like to become a member, please contact the Secretary secretary@nottinghamastro.org.uk or speak to any NAS committee member at one of the regular monthly meetings. A membership application form is inside this issue of the Journal.
