Thursday, 7th September Gotham Memorial Hall Gotham, NG11 0HE

8 pm (doors open at 7 pm)
This evening we give a warm welcome to

Dr Clive Tadhunter

of the University of Sheffield who will be speaking on

Galaxy Evolution revealed by the Hubble Space Telescope

Notice of an Extraordinary General Meeting on September 7th

There will be an Extraordinary General Meeting of the Society at 7:45pm *(prompt)* on Thursday September 7th 2017 at Gotham Memorial Hall, Gotham, Nottingham, NG11 0HE.

The purpose of the meeting will be to consider and, if thought fit, to adopt a new constitution for submission to the Charities Commission along with an application to become a Charitable Incorporated Organisation.

Sky NotesSeptember 2017

Compiled by Roy Gretton

All times given below are in British Summer Time

The **Autumnal Equinox** this year occurs at 9:03pm on September 22nd. At this time the Sun will be directly above Earth's equator. Thereafter which it will reside in the southern celestial hemisphere until March 20th next year.

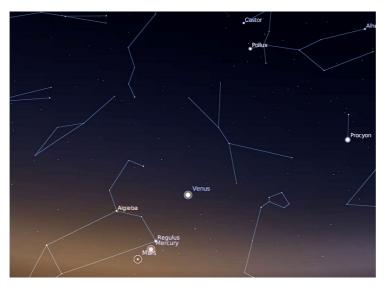

PHASES OF THE MOON

Phase	Date and time
Full Moon	7:11pm on August 7 th
Last Quarter	2:15am on the 15 th
New Moon	7:30pm on the 21st
First Quarter	9:13am on the 29 th

This month the Moon is closest to the Earth on the 18th, and furthest on the 2nd.

THE PLANETS

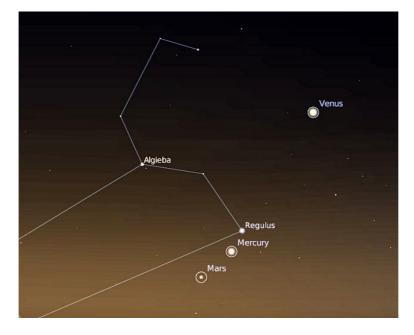

Mercury begins September as a morning object, moving away from the Sun until it reaches greatest western elongation on the 12th. Although this will be one of the best morning apparitions of 2017, Mercury (at magnitude –0.5) won't be easy to observe, being very low down in the east before sunrise. In fact, there will be three planets close together in the morning sky at this time, but of these, only Venus will be easy to spot.

Looking east at 5:30 am on September 12th

Venus (magnitude -4) remains bright in the morning sky, although its separation from the Sun is gradually diminishing. It is in fact moving away from us, toward the far side of the Sun, which it will reach early next year.

Tiny, distant **Mars** (magnitude 1.8) is too close to the Sun to be seen at all as September begins, but will start to become observable in the morning sky toward the end of the month. Even then, for many weeks it will still be too far away to show any worthwhile surface detail.

A closer view of the planets in the eastern sky at 5:30am on September 12th

You may be able to spot **Jupiter** (magnitude -1.7) low in the west after sunset as September begins, but by the end of the month it will have disappeared into the solar glow as it heads toward conjunction with the Sun in October.

In mid-September **Saturn**, in the constellation of Ophiuchus, will be about 10 degrees above the SSW horizon at 9pm...so a very challenging object to observe! In fact throughout this month the planet will be further south than declination –22 degrees, so very poorly placed for UK observers. Unfortunately we shall have to wait some years for the situation to improve markedly.

Uranus (still a morning object, about 10 degrees north of the celestial equator in the constellation of Pisces) will be above the horizon for much of the night by the close of September. At magnitude 5.8 it is theoretically within the limits of naked eye visibility, but realistically you will need binoculars to go searching for this planet. Through a telescope it appears as a pale greenish disk, 3.6 arcseconds across.

Neptune will be at opposition to the Sun on September 5th, when it will be nearly 8 degrees south of the celestial equator in the constellation of Aquarius, and shining at magnitude 7.8.

METEORS

September isn't a great month for meteor showers, although there is usually a feeble "drizzle" of meteors close to the plane of the ecliptic at this time of year. Some of these are characterised as **Piscids**, that typically give a handful of events per hour at maximum, which this year occurs on September 9th.

DIARY DATES 2017

Monthly Meetings of the Nottingham Astronomical Society

1) Meetings at Gotham Memorial Hall

Nottingham Road, Gotham, NG11 0HE

Held on the **FIRST Thursday** of each month except **August** Doors open at 7pm for 8pm start.

These events are normally centred around a talk by a visiting speaker, except Opening Evenings, when NAS members provide the activities. Normally we have a **Library** and a **Helpdesk** open at each meeting.

<u>Date</u>	<u>Topic</u>	<u>Speaker</u>		
September 7 th	Galaxy Evolution revealed by the Hubble Space Telescope	Dr Clive Tadhunter University of Sheffield		
October 5 th	Space Stations from Salyut to the ISS	Dr Mike Leggett, FRAS		
November 2 nd	Annual General Meeting			
December 7 th	Voyager 40 Years On (Part 1)	Paul Money, FRAS		

Check our website: www.nottinghamastro.org.uk for the latest information about the Society's meetings and for further information about the talks and speakers.

For your information, the Society has now booked the use of the Gotham Memorial Hall for all of our First Thursday meetings in 2018

2) Social and Practical Astronomy Meetings at the Burnside Memorial Hall, Plumtree

Church Hill, Plumtree, Nottingham, NG12 5ND

Held on the THIRD Thursday of each month from 7:30pm

These meetings are of a more informal nature, providing opportunity for members and guests to share their hobby over a cup of tea or coffee, as well as listening to a short talk.

Members and their guests are welcome.

The next meeting will be on September 21st

Social and Practical Astronomy, Plumtree

The **September** meeting at Plumtree will be a talk by NAS member Leigh Blake on astrophotography; the exact title is yet to be decided, but with Leigh's knowledge and skill it will no doubt be helpful and interesting, whatever your ability.

The image below was taken by Leigh and is of the <u>Bubble Nebula</u> (NGC 7635 / Caldwell 11) as seen in the hydrogen alpha wavelength. The Bubble Nebula is to be found in the constellation of Cassiopeia.

As always, the doors will open at 7:30pm and the session will start at 8pm on **September 21**st.

The NAS Barbecue, 2017

This year's summer barbecue took place for the first time on a Sunday, after the weather forecast for the previous day had threatened us with heavy showers, possibly accompanied by thunder. Thankfully the afternoon of Sunday August 6th turned out to be dry, with a mixture of cloud and sunshine, so that telescopic observation of the Sun was possible from time to time.

Richard Mabe did sterling service as chef-in-chief, ensuring that our barbecued food was well cooked. Here is Richard's account of the day:

The day of the summer BBQ finally arrived. Warm and sunny, tents up, cookers cleaned, a generous collection of gifts donated for the raffle, trays of buns a-plenty and John's onions warming over charcoal.

Lighting the BBQ proved challenging. Even Fred's slightly urgent, yet noble, efforts blowing trumpet-like on to smouldering coals failed to spark ignition. With 1pm fast approaching, an urgent dash for lighter gel from Cotgrave started things cooking.

Around 20 members and guests attended an enjoyable, relaxed, sociable afternoon. John gave tours of the observatory and members old and new had the chance to meet up. Thanks to all for joining in.

...and many thanks to you, Richard.

Meetings

Our formal meetings, often with an illustrated talk by a guest speaker, are held on the first Thursday of each month (except in August) at:

Gotham Memorial Hall

Gotham

Nottingham NG11 0HE

Doors open 7.00pm

Meetings start 8.00pm

Meetings end 10.00pm

These meetings are open to the public, and visitors are welcome to attend.

Annual subscriptions 2017

Full £30

Joint rate for partners

living at the same address £45 Under-18s and full-time students £5

Subscriptions become due on 1st January. Half-price subscription is charged if joining after 30th June (minimum subscription £5).

Please make cheques payable to: Nottingham Astronomical Society.

If you would like more information about the **Nottingham Astronomical Society**, or would like to become a member, please contact the Secretary <u>secretary@nottinghamastro.org.uk</u> or speak to any NAS committee member at one of the regular monthly meetings. A membership application form is inside this issue of the Journal.
